

Avionté Staffing Software Continues Paperless Initiative with Global Cash Card Partnership

Avionté Staffing Software integrates paycard solution allowing staffing clients to provide employees greater payroll convenience and flexibility

St. Paul, MN, February 23, 2010 --(PR.com)-- Avionté Staffing Software, a leading provider of software for staffing and recruiting firms, announced today a new partnership and integration with Global Cash Card, the proven specialist in paycard solutions. Headquartered in Irvine, California, Global Cash Card is a wholly owned subsidiary of World Processing, LTD, and has been specializing in customized paycard solutions since 2003.

Avionté clients will now have a seamless solution that enables them to pay employees using a secure and simple paycard solution. The entire process is administered within the Avionté System allowing for two-way, instant data transfer between Global Cash Card and Avionté. This eliminates any need to access another system or manually feed information back and forth, resulting in greater efficiency and costs saving for staffing firms. All of the banking and paycard information is setup within Avionté, allowing employees to have payroll loaded directly onto their personal paycard at any point in time.

LaborWorks is the first of many Avionté [Staffing Software](#) clients to implement the Global Cash Card solution. “The Global Cash Card integration with Avionté went very smoothly; even the small glitches that we've encountered have been handled quickly and professionally by both Avionté and Global Cash Card. In comparison to our prior card and software system, working with Global Cash Card and Avionté is a vast improvement both in terms of system improvement and the overall benefit a paycard should provide. We are so pleased with the process that we are transitioning all of our pay process to the Global Cash Card,” said Al Bacon, CFO of LaborWorks Industrial Staffing.

The integration provides staffing firms a way to service their employees more effectively by providing them the convenience of instant access to their money. In addition, employees will save money by eliminating check cashing and overdraft fees, be able to use their card for online purchases and enjoy the security that goes with carrying a card, rather than cash.

John Long, CEO of Avionté remarked, “Partnering with Global Cash Card was yet another way we could offer our clients a true paperless solution, reducing both expenses and administrative time. By eliminating the need for paper checks and providing an attractive solution for employees who may not have or simply can't manage a bank account, we were able to create a win for everyone involved.”

About Avionté Staffing Software

Avionté Staffing Software began with the uniting of four of the staffing industry's proven software sales and technology experts.
